Reducing the Risk from Infectious Diseases

Getting the TV + Film Industry Back to Work

Trifecta Solutions
Critical Thinking for the Health Care Domain

Do people feel safe?

Can we stay safe and still produce great content?

How can we avoid another shutdown?

How to Reduce the Risk for the Industry?

Integrated Strategy: Our Process

- We are helping TV + Film Industry adapt to working in a constantly changing health environment by applying Infection Prevention + Control measures (that have been proven effective in military settings and structures) to this novel setting in TV + Film Productions
- We use a systems engineering perspective to examine and modify workflows
- A change management model is utilized to help production crew transition to these new, safer workflows
- Existing technologies, including COVID-19 testing, are being leveraged as they become available

Trifecta Solutions

Our Services

Pre-Production: Develop an Implementation Plan

- Develop infection prevention and control implementation plan for production
  - Provides a risk assessment for the production project
  - Provides risk mitigation measures for the specific production project
  - Provides detailed guidance for each production specialty
- Includes initial crew and cast training (before production):
  - General COVID-19 information and information on individual protective measures (1 hr duration)
  - Discipline-specific guidance on how to modify workflows to enhance health and safety during production
- Includes consulting services (addressing specific issues) before production
- Cost is tailored to size and scope of production

Production: COVID-19 Compliance Officer

- Provide a formally trained/certified Infection Prevention Control Preventionist to serve as a COVID-19 Compliance Officer who will:
  - Conduct daily personnel health surveys and surveillance on arrival and departure at production site
  - Monitor health and safety workflows to ensure they are safe and effective (many workflows fail because they are not optimally designed, not because people are not 'compliant')
  - Provide daily reports to production leadership on any health and safety issues
  - Support production response to any identified or potential cases of COVID-19
- Provide crew/cast training to new members, as needed
- Cost is tailored to size and scope of production

Consulting Services

- Review existing production policies and procedures
- Assist in selecting most effective PPE, cleaners, and disinfectants
- Provide assistance in determining solutions to any identified health and safety issues
- Provide COVID-19 training, on request
- Provide Physician Oversight
- Request a rate sheet for costs. Consulting Services can be purchased separately from Implementation Plan or Compliance Officer services. Discounts available if consulting hours are purchased as packages (e.g. 5 hrs at a time)

Trifecta Solutions

Who is Trifecta Solutions?

Owners Lynn DiFato and Debra Schnelle have over 14 years experience, consulting to multiple Air Force Surgeons General and maintaining high standards of Infection Prevention + Control (IPC) in large and complex healthcare systems. They helped to develop the official Air Force Pandemic Flu Plan and the Army Smallpox Response Plan and co-authored an article evaluating the use of disease transmission models during a pandemic outbreak which predicted the current situation.

Lynn DiFato has over 37 years of public health, infection control, and nursing experience. She has managed a variety of military programs related to Infection Prevention and Control, Medical Surveillance, Joint Force Health Protection, and Medical Nuclear Biological Chemical Defense.

Debra Schnelle is a certified project management professional (PMP), and managed a medical chemical, biological, and nuclear countermeasures program for the U.S. Army. She has extensive program development and management experience and draws upon the infection prevention and control expertise of the company.

Mary Anne Yip applies her military and private sector nursing experience (29+ years) and Certified Infection Control (CIC) knowledge to develop IPC plans to meet the unique requirements for each production that adheres to CDC guidelines, utilizes current best practices, and

Lynn DiFato and Mary Anne Yip are seasoned professional nurses who lead our Infection Prevention + Control team of knowledgeable and experienced infection control professionals.

Marie Babouchian, Production Executive in Charge, is a TV + Film production executive with an extensive twenty years' experience in production on various platforms and formats. She applies her vast knowledge and relationships to ensuring IPC plans are tailored for varied productions.

Trifecta Solutions

Why Trifecta Solutions?

- Infection prevention and control is a core competence of the military since the Crimean War – where 70% of all casualties in war were due to disease.
- Our Infection Prevention and Control teams are led by experts Certified in infection Control (CIC) with decades of experience in the largest healthcare systems in the world (Military Health System and Veterans Health Administration).
- Our military experience gives us the ability to apply Infection Prevention and Control in challenging and novel environments: combat operations, natural disasters, and more.

Let us get you back to work safely!
